**Need More Than
Pocket Money?**

**The NWCA has a program to
put some real money in your pocket.**

Read inside to find out how.

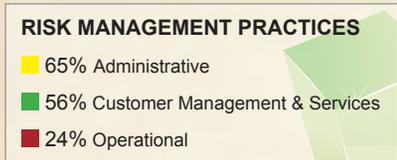

What is the RMES-C?

The Risk Management Evaluation System (RMES-C) is a quick, effective method which business owners and managers can use to evaluate how well their companies are protected from the major risk factors that affect their profitability and in some cases even their survival.

- ✓ **Asks 37 questions that require only a “Yes” or “No” answer**
- ✓ **Provides guidance on practical, often inexpensive, solutions to reduce risks**
- ✓ **Includes instructions and guidance written in layman’s terms**

What Do I Do With It?

- **Use the results to:**
 - ✓ **Identify and Remedy Potential Risks in Your Business**
 - ✓ **Improve Business Practices**

- **Use it as a tool to:**
 - ✓ **Obtain the Major Benefits of the RMES-C**

The RMES-C was developed by the NWCA to provide contractors with a comprehensive method for evaluating their own operations and achieving significant benefits from that evaluation.

RMES-C Contractors’ Benefits

Protect Your Business

All construction companies face a variety of risks as a part of doing business. ***The RMES-C is the most comprehensive tool available to identify those risks and determine how to reduce them.***

- **Assure Risks Are Handled**
The RMES-C identifies the vast majority of risks faced by construction companies. Participating contractors know where they stand on the key administrative, operational and customer services practices that make a difference.
- **See How You Score**
The scoring feature in the RMES-C program enables contractors to see how they stand in terms of measured positive practices.
- **Demonstrate Control To Service Providers**
Using the RMES-C shows other service providers that the contractor knows and controls key factors affecting his/her business.
- **Qualify For Insurance Discounts**
Some NWCA endorsed insurance programs may require participation in the RMES-C in order to purchase the insurance. Others require participation in order to obtain a discount.
- **Qualify For Other Discounts**
Participation in the RMES-C also enables NWCA members to qualify for participation in, and sometimes discounts from, other programs and services provided by NWCA endorsed member service providers.

The RMES-C is the only program of this type offered by a member of the building industry to help contractors evaluate the risks in their businesses and realize benefits from doing so.

Member Service Providers’ Benefits

The RMES-C also provides benefits to selected Member Service Providers (MSP) endorsed by the NWCA:

- **Real-Time Transparency**
The RMES-C provides assurance of the positive practices utilized by participating NWCA members.
- **Confirmation Of Practices**
The RMES-C automatically provides the MSP with proof of member responses.
- **Comparisons**
The scoring system of the RMES-C enables the MSP to make comparisons with other companies, other regions and other data measures.
- **Focus MSP Efforts**
The RMES-C gives the MSP the ability to zero in on key practices that differentiate an NWCA member from other prospects.
- **Basis For Special Pricing, Terms**
The RMES-C provides the MSP with a fact-based tool for validating special pricing or terms and conditions when warranted.
- ✓ **Put Money in Your Pocket**
- ✓ **Help Ensure Profitability of Your Company**
- ✓ **Contribute to the Safety Net that Protects the Survival of Your Company**

The use of the RMES-C by the MSP is another example of the integration of NWCA programs and services, with contractors, subcontractors and service providers working together to help all participating companies be profitable members of the building industry.
