Claims Reporting Expedient, Transparent, Simple

Reduces the cost of bodily injury and employee time loss claims, thereby reducing insurance or self insurance costs. Allows for improved compliance with safety regulation and provides a more direct connection between the employees and their safety culture. Imagine a risk manager on demand everywhere.

Statistics show that time loss injury claims are reduced by more than half if reported and acted upon in 72 hours or less. Why is this? Injured parties who are not contacted promptly are likely to seek legal assistance or disengage from the team culture of their employer. Claims Captain reduces the risk of employees feeling neglected and assists in improving their claims handling and response.

Key Features:

- Smart Phone quick reporting and claims set up
- Automated manager and carrier notifications
- Approved, electronically fillable reporting forms
- Tailored indexing and storage of supporting documents and photographs
- Employer claims management tools

Key Benefits:

- Lowers insurance or self insurance costs
- Demonstrates and documents commitment to safety culture
- Allows improved employee care/third part care at time of injury
- Flexible and can be used in documenting other injury claims
- Integrates with Web based programs
- Anywhere, Anytime
